

Product information

Classic Gear Oil SAE 90 GL1

Bardahl Classic Gear Oil SAE 90 is a 100% mineral single grade gear oil. The chosen viscosity, specially for classic cars, provides a constant lubrication under extreme loads.

Bardahl Classic Gear Oil SAE 90 contains a minimum of additives and is fully compatible with brass, bronze, copper and nonferrous metals. It is suitable for sealing materials of the time (paper, cork, felt and fabric). The excellent adhesion contributes to minimal wear, even after a long stand still period.

Applications

Suitable for gearboxes and final drives of classics that demand a single grade gearbox oil.
