If you are looking for gifts for men, this is the right place for you

Rock'n'Roll is the music of the generation Daddy. In her honor, Revell has come up with something very special: With the Truck & Trailer "AC/DC" in limited Auflage, the Spitfire "Aces High" Iron Maiden and the "KISS Tour Truck" three of the biggest rock bands of all time are awarded duly. In the past 45 years, KISS in particular have shaped music like no other band. Hits like "Nothin' to Lose", "Nowhere to run" and of course "I was made for lovin' You" are milestones in rock history. The mixture of guitar-influenced hard rock and hymn-like ballads was the sound that made the later "stadium rock" and "pop metal" of the 1980s possible in the first place. A ticket to one of KISS's spectacular concerts has always been one of the most coveted gifts for men. And not infrequently griffen even the really tough guys among the fans to the make-up pot to look like their idols. Insider knowledge: Bassist Gene Simmons, the "man with the longest tongue in the world", was born in Israel as a Chaim joke. He speaks not only English, but also fließend German, Hebrew and Hungarian.
